A. the ID Vault

B. the IdP Catalog

C. the Credential Store

D. each user\\'s Notes ID

Correct Answer: B

QUESTION 5

In the Fault Reports database, a fault report is in the Possible Problem (possibly actionable) category of the View By Disposition view. What is the description of this category?

A. The fault reports in this category have sufficient information to match their crash stacks against previouslyreported crashes.

B. The fault reports in this category have sufficient information to investigate the problem, but are not likely to result in action that the administrator should take.

C. The fault reports in this category have sufficient information toinvestigate the problem, however IBM recommends to collect new data for further investigation.

D. The fault reports in this category do not contain sufficient information to investigate the problem. However, IBM is constantly improving its data collectiontechniques, and fault reports on similar crashes in the future will be likely to contain more necessary information.

Correct Answer: B
