QUESTION 1

Karl is working at the abc/renovations server console and wants to receive changes from the xyz/renovations server. What command will accomplish this task?

- A. pull xyz/renovations
- B. replicate abc/renovations
- C. tell replica xyz/renovations
- D. push xyz/renovations abc/renovations

Correct Answer: A

QUESTION 2

The IBM Domino Configuration Tuner database in the environment contains outdated rulesets. In what way are new rules applied?

- A. The new rules must be manually copied from the Domino server into the existing database.
- B. The new template design is retrieved from the Domino server and applied to the database with the new rules.
- C. The new rules must be manually created for the environment from the descriptors provided by the Domino server.
- D. The Domino Configuration Tuner server task must be stopped, and the existing database must be deleted. Restarting the Domino Configuration Tuner task will build a database with the new rulesets.

Correct Answer: B

QUESTION 3
