### QUESTION 1

The IBM Domino Configuration Tuner database in the environment contains outdated rulesets. In what way are new rules applied?

- A. The new rules must be manually copied from the Domino server into the existing database.
- B. The new template design is retrieved from the Domino server and applied to the database with the new rules.
- C. The new rules must be manually created for the environment from the descriptors provided by the Domino server.
- D. The Domino Configuration Tuner server task must be stopped, and the existing database must be deleted. Restarting the Domino Configuration Tuner task will build a database with the new rulesets.

Correct Answer: B

---

### QUESTION 2

IBM Domino Domain Monitoring (DDM) probes are configured in which database?

- A. ddm.nsf
- B. names.nsf
- C. statrep.nsf
- D. events4.nsf

Correct Answer: D

---

### QUESTION 3

What is the Domino Attachment and Object Service (DAOS) used for?

- A. DAOS is used to upload and share files from the sidebar of the IBM Notes client to IBM Connections.
- B. DAOS is used to upload and share files from the sidebar of the Notes client to social media Internet sites.
- C. DAOS is used to save disk space on the client machine by storing a single copy of identical attachments.
- D. DAOS is used to save disk space on the server by storing a single copy of identical document attachments.

Correct Answer: D

---

### QUESTION 4

Kat is setting up an LDAP client to connect to the IBM Domino LDAP service. Which statement is true about the LDAP service that Kat wants to connect to?

- A. Kat would have to set up Directory Assistance before an LDAP service can be started.
- B. Kat would have to set up a Directory Catalog before an LDAP service can be configured.
- C. The LDAP task is not necessary for Kat to connect to the LDAP service. She should be able to connect to the Domino Directory using an LDAP client.
- D. The LDAP task runs automatically on the administration server for the primary Domino Directory. On other servers in the domain, Kat would have to run the LDAP task manually.

Correct Answer: D

---

#### QUESTION 5

Mitchell wishes to disable transaction logging for a particular database on a server with transaction logging enabled. However, he cannot see the Advanced Database Properties to do so. What is the cause of this?

- A. He is not in the "Administrators" field on the server document.
- B. He cannot selectively turn off transaction logging for individual databases.
- C. Transaction logging can only be disabled per document, not for an entire database.
- D. He must add the notes.ini parameter to the server: DisableTransLog=[name of database].

Correct Answer: A
