QUESTION 1

What is the Domino Attachment and Object Service (DAOS) used for?

- A. DAOS is used to upload and share files from the sidebar of the IBM Notes client to IBM Connections.
- B. DAOS is used to upload and share files from the sidebar of the Notes client to social media Internet sites.
- C. DAOS is used to save disk space on the client machine by storing a single copy of identical attachments.
- D. DAOS is used to save disk space on the server by storing a single copy of identical document attachments.

Correct Answer: D

QUESTION 2

The IBM Domino administrator is manually creating a directory from pubnames.ntf for external web user authentication. She wants the web servers that currently use Configuration Directories to utilize the new directory as their remote primary Domino Directory. Which step is required to configure this?

- A. Create a unique Domino domain name for the new directory in the Directory Assistance database.
- B. Replicate the new directory to all servers in the environment and enable HTTP web user authentication.
- C. Establish a mobile directory catalog and restrict new user creation to the new web user authentication directory.
- D. Specify the Domino domain of the servers with the Configuration Directories as the same in the Directory Assistance database.

Correct Answer: D

QUESTION 3
