### QUESTION 1

Barry has written an XPage which utilizes code in custom Java classes. When opening the XPage the following security exception is thrown "java.security.AccessControlException: access denied (java.lang.RuntimePermission getClassLoader)". What can be added to the java.policy file on the server to prevent this error?

- A. `grant { permission getClassLoader; }`
- B. `allow permission getClassLoader;`
- C. `grant { permission java.lang.RuntimePermission "getClassLoader"; }`
- D. `allow permission java.lang.RuntimePermission "getClassLoader";`

Correct Answer: C

---

### QUESTION 2

What is the easiest method to disable read return receipts for all incoming emails on a server?

- A. Advise users to disable return receipts in their Mail Preferences.
- B. Read return receipts are part of the SMTP and cannot be disabled.
- C. Disable the "Return receipts" option in the Configuration Settings document of the server.
- D. Enforce the "Disable return receipts" setting in a mail settings policy and apply to all users.

Correct Answer: C

---

### QUESTION 3

The administrator has been asked to move a user's mail file because the user has moved to a different office. When the mail file is moved, the Administration Process first moves it to the new server, then issues a request to delete the old mail file from its original mail server. Which statement defines what must be performed to complete the deletion process?

- A. The administrator must approve this mail file deletion.
- B. The mail file owner must approve the old mail file deletion.
- C. The mail file owner must accept the changes when prompted.
- D. The administrator must notify the mail file owner to accept the deletion.

Correct Answer: A

---

### QUESTION 4
