QUESTION 1

Mary created an agent in a new database that does the same thing as an existing agent in another one of her databases. When Mary copies the agent from the existing database to the new database, she sees the error "Error loading Use or UseLSX module TimeUtilities" on this line in her agent - Use "TimeUtilities".

What must Mary do to get this agent working in her new database?

A. Mary needs to create a form in that database called TimeUtilities.

B. Mary needs to recompile the agent in the new database to resolve this issue.

C. Mary should copy the script library called TimeUtilities from the old database to the new database.

D. TimeUtilities is a standard LSS file provided by IBM and Mary should install that LSS file on the machine with the new database.

Correct Answer: C

QUESTION 2

Which three statements are true with regards to SAML? (Choose three.)

A. SAML can only be used with non-SSL configurations on the web.

B. Only web client users can make use of SAML-based authentication

C. Only IBM Notes client users can make use of SAML-based authentication.

D. For web client users, SAML authentication facilitates a single-sign on solution in which the user\\'s ID file is downloaded from the Notes ID vault

E. It allows a user to authenticate once with a designated identity provider (IdP), after which the user can access any server that is partnered with the IdP

F. SAML is most useful when an IBM Domino environment includes third-party Web applications whose services your users access, or if multi-session server authentication is too limiting for your organization

Correct Answer: DEF

QUESTION 3

Eclipse-based source control clients work on physical files. As such they can not directly work with IBM Domino Designer projects that contain virtual files mapping to NSF-based design elements. Which statement defines these design elements?

A. They only work with projects that are saved on disk.

B. They with projects that have source controls defined.

C. They work with projects that are available on the network.

D. They only work with projects that are registered as source control compatible.

Correct Answer: A

QUESTION 4

What is the primary purpose of a master template?

A. It is required to use XPages.

B. It is required to use external data sources.

C. It prevents users from updating applications.

D. It keeps application instances consistent in design.

Correct Answer: D

QUESTION 5
