QUESTION 1

How can a developer find out which applications are his that are not in any working set?

- A. Click on the hotspot labeled "Applications not in Working Set" on the Discover page of the IBM Domino Designer client.
- B. Any application opened in the Domino Designer client is part of a working set so there are no application not in a working set.
- C. Use the Working Sets Eclipse view to show the contents of all the working sets as well as the applications not in a working set.
- D. There is no way to do this automatically and the developer will need to manually go through all of the working sets to see what they contain.

Correct Answer: A

QUESTION 2

Charles is creating an XPages application for his company. He will use data binding in his application. Which statement describes data binding in an XPage?

- A. Data Binding is the process by which a control on an XPage is configured so it can write data to an XPage source.
- B. Data Binding is the process by which a control on an XPage is configured so it can read data from an XPage source.
- C. Data Binding is the process by which a control on an XPage is configured so it can write/read data to/from an IBM Notes database.
- D. Data Binding is the process by which a control on an XPage is configured so it can write/read to/from a legacy database such as IBM DB2.

Correct Answer: C

QUESTION 3

Sally has a form with a Readers field on it. That field is computed and its value is "Users". When a document is created with the form, what effect does the field have on that document?

- A. Members of the Users group are able to see the document.
- B. Members of the Users group are not able to modify the document.
- C. Members of the Users group are not able to replicate or copy the document.
- D. There will be no effect if the members of the Users group have higher than Reader level access to the database.

Correct Answer: A

QUESTION 4

James is using a profile document in his application.

Which statement describes how users of the application will view the profile document?

- A. Profile documents cannot be viewed in a finished application.
- B. Profile documents will appear using the View menu - Show Profiles.
- C. Profile documents can only be viewed by the developer of the application.
- D. Profile documents do not appear in views and are only accessible through formulas and scripts.

Correct Answer: D

QUESTION 5

Eclipse-based source control clients work on physical files, and they work with the IBM Domino Designer projects elements on the physical files. Which statement describes these elements?

- A. They only work with projects that are saved on disk.
- B. They work with projects that are available on the network.
- C. They work with projects that have source controls defined.
- D. They only work with projects that are registered as source control compatible.

Correct Answer: A
