### QUESTION 1

How would a developer use an existing script library containing Java code used in a Java agent?

- A. Add the name of the agent to the UsedBy field on the design tab of the script library.
- B. Create a new Java class in the agent that has the same name as the desired library.
- C. Edit the Java project for the agent and use the import button to choose the desired library.
- D. There is no such thing as a script library for Java. Script libraries are used for IBM LotusScript and JavaScript only.

Correct Answer: C

---

### QUESTION 2

If the name of the signer of an agent is listed in the "Sign or run unrestricted methods and operations" field on the Security tab of the Server document, what does this allow the agent to do?

- A. This security level is the minimum required for an ID to be able to sign agents to run scheduled on the server.
- B. This security level will allow the agent to run and access IBM Domino databases on other servers and request and update data in them.
- C. This security level will allow the agent to run scheduled on the server and perform any action including making operating system level calls.
- D. This security level will allow the agent to access any databases on the server regardless of the access control list entry for the ID that signed the agent.

Correct Answer: C

---

### QUESTION 3

Where are two places that document encryption is specified? (Choose two.)

- A. field properties
- B. form properties
- C. server properties
