A. The XML tag for the Single Page Application control is .

B. The XML tag for the Single Page Application control is .

C. The Single Page Application control is used only when the mobile XPage includes a single mobile page.

D. There must be only one Single Page Application control as the container for all of the Application Page controls on the mobile XPage.

Correct Answer: D

QUESTION 5

Helen is using a Repeat control to add a row to a table for each view entry in a Domino View data source. When she tests her code she sees 10 tables and not one table with 10 rows. How could she correct this?

A. In the Output section select the "Create as a Table" option and individually add the fields to be displayed.

B. Use the ignoreTableHeader property of the repeat control to suppress the creation of multiple tables.

C. Change the number of rows to be displayed from 100 to 10 and that will create only one table with 10 rows.

D. Take the Table Header row and Footer row lines of source code and move them outside of the repeat control.

Correct Answer: D
