- B. TravConf.nsf
- C. IBM Notes Traveler Remote Administrator
- D. IBM Domino Administrator client

Correct Answer: D

QUESTION 3

Max has an application that her company's Chicago office uses on their Chicago server. She would like her company's Boston office to access the same application on their Boston server but needs for changes to each application to be kept in sync. How should Max create the application on the Boston server?

- A. Max should create a new copy of the application on the Boston server.
- B. Max should create a new replica of the application on the Boston server.
- C. Max should create a new application based off the template on the Boston server.
- D. Max should create a new application based off the Single Copy Template on the Boston server.

Correct Answer: B

QUESTION 4

Annie's workflow database was designed as a traditional web application. She would like to update it to make it accessible to IBM Notes client users. What advantage does redesigning it to use XPages give her?

- A. XPages gives her one consistent appearance whether viewed in Notes or a web browser.
- B. XPages gives her the ability to reuse existing pages on her new XPage design elements.
- C. XPages allows her to bind existing pages to the new XPage design elements she creates.
- D. XPages allows her to move IBM LotusScript code from webquery agents to XPage events without changes.

Correct Answer: A

QUESTION 5

Bridget has created a Domino Document data source (document1) on her XPage. She needs to bind the Name field on her Employee form to the inputText1 edit box on the XPage. Which of the following set of steps can she use to do this?

- A. Select Name, go to the Data section of the properties, select Employee as the data source and inputText1 to bind to.
- B. Select inputText1, go to the Data section of the properties, select Employee as the data source and Name to bind to.
- C. Select Name, go to the Data section of the properties, select document1 as the data source and inputText1 to bind to.
- D. Select inputText1, go to the Data section of the properties, select document1 as the data source and Name to bind to.

Correct Answer: D
