QUESTION 1

PreferencePortlet is Portlet Specification 2.0-compliant and the system is running IBM WebSphere Portal 8.0.

What is the output of the following code?

public PreferencePortlet extends GenericPortlet{ protected void processAction(ActionRequest actionRequest, ActionResponse){ actionRequest.getPreferences().setValue("test","ViewModePreferenceValue"); actionRequest.getPreferences ().store(); } protected void doView(RenderRequest renderRequest, RenderResponse renderResponse) throws PortletException, IOException { // Generate action URL }

A. The container throws java.lang.IllegalStateException because it is not allowed to change preferences in the processAction() method.

B. The code compiles and executes fine. It stores a "test" preference at the end of the processAction() method call.

C. The container throws javax.portlet.ReadOnlyException because it is only allowed to view preferences in the processAction() method.

D. This code results in a compiler error because PortletPreference does not have the store() method.

Correct Answer: B

QUESTION 2

The XYZ company has a custom portlet that provides access to data from the company\\\'s mainframe. Twice a day, the mainframe performs a batch process to update the data. During the batch process, the portlet cannot access the data. Which one of the following options allows Sara to hide the portlet during the batch processing times?

A. Use the Policy editor to create a portlet availability policy, then use the Page Layout editor to assign the policy to the portlet.

B. Use the Policy editor to create a portlet availability policy and to assign the policy to the portlet.

C. Use the Personalization editor to create a portlet visibility rule, then use the Page Layout editor to assign the rule to the portlet.

D. Use the Personalization editor to create a portlet visibility rule and to assign the rule to the portlet.

Correct Answer: C

QUESTION 3

Frances is debugging an iWidget that should show a loader bar until markup is generated and shown, leveraging only lifecycle functions. Right now, she can only see the loader bar, but nothing else happens in the iWidget. She has verified that all dependencies have loaded properly and that the elements have rendered. What should she verify next?

A. Verify that the onUnload method is properly modifying the page content after loading completes.

B. Verify the onLoad method kicked off background functions needed to render the markup.

C. Verify that the readyMarkup method is properly implemented.

D. Verify that the view is a supported mode for the iWidget.

Correct Answer: B

QUESTION 4

Evan needs to share action URL parameters used in a portlet with another portlet. In the binding section of the WSDL files used for specifying a portlet\'s participation with the property broker, an action URL parameter can be bound to several scopes. Which one of the following options best describes the scopes that Evan can use to share the action URL parameters using the property broker?

A. Page attribute, Request attribute, Request parameter, Session attribute

B. Request attribute, Request parameter, or Session attribute

C. Request parameter or Session attribute

D. Session attribute only

Correct Answer: B

QUESTION 5

What is a processing advantage of public parameters over event operations?

A. No action phase required.

B. No limits to the payload data.

C. No need to distribute events to portlets.

D. Notifications are handled by the browser.

E. No action phase required and no need to distribute events to portlets.

Correct Answer: C
