### QUESTION 1

Betty would like to setup a portal farm. What are the two types of supported configurations that she can choose when setting up a portal farm?

- A. She can set up a unique installation where each farm has a unique installation or she can set up multiple instances that are shared between multiple farm instances.
- B. She can clone installations where each farm is not a unique installation or she can set up one instance that is shared between multiple farm instances.
- C. She can set up a unique installation where each farm has a unique installation or she can set up one instance that is shared between multiple farm instances.
- D. She can clone installations where each farm is not a unique installation or she can set up multiple instances that are shared between multiple farm instances.

Correct Answer: C

---

### QUESTION 2

After installing an IBM WebSphere Portal 8.0 server as a primary server, which of the following options needs to be done to add the primary portal server node to a static cluster?

- A. Run the addNode command to federate the node and set up the cluster.
- B. Run the addNode command to federate the node, and run the ConfigEngine tasks to set up the cluster.
- C. Run the ConfigEngine tasks to add the node to the cell, and run the addNode command to federate the cluster.
- D. Run the ConfigEngine tasks to add the node to the cell and to set up the cluster.

Correct Answer: B

---

### QUESTION 3

Which of the following options is true of VMware technology with IBM WebSphere Portal 8.0?

- A. VMware can be used to mass-replicate identical operating systems installed and configured with WebSphere Portal.
- B. VMware can be replicated with WebSphere Portal with multiple profiles.
- C. WebSphere Portal cloning is not supported with VMware.
- D. VMware cannot be used to mass-replicate identical images because WebSphere Portal is tied to the host name.

Correct Answer: A

---

### QUESTION 4
