### QUESTION 1

Franklin is an IBM Web Content Manager administrator for his company. His company has another content management system where content authoring is done. They have a custom application that provides the update as an RSS feed that can be consumed by IBM WebSphere Portal server - Web Content Integration to consume and then render contents from WebSphere Portal server. The feed contains many embedded links to images using the image tag. Franklin wants these images to be saved as image components and the reference updated when the content is created.

What configuration changes are required to enable automatic image tag processing?

- A. Edit the disable.img.proc setting in the WCMConsumerPlugin.properties file, set it to "false," and restart the WebSphere Portal server.
- B. Edit the enable.img.proc setting in the WCMConsumerPlugin.properties file, set it to "true," and restart the WebSphere Portal server.
- C. Edit the process.img.tag setting in the WCMConsumerPlugin.properties file, set it to "true," and restart the WebSphere Portal server.
- D. Edit the process.img.tag setting in the WCMConsumerPlugin.properties file, set it to "enabled," and restart the WebSphere Portal server.

Correct Answer: A

---

### QUESTION 2

Mario is creating a rendering plug-in. He is writing a plug-in that uses attributes from the current user's profile to determine whether the body of the plug-in tag is rendered or not. The plug-in will be referenced within his web content using a plug-in tag. In order to create this plug-in, Mario must implement which interface?

- A. com.ibm.workplace.wcm.api.plugin.context.ContextPlugin
- B. com.ibm.workplace.wcm.api.plugin.rendering.RenderingPlugin
- C. com.ibm.workplace.wcm.api.plugin.content.ContentPlugin
- D. com.ibm.workplace.wcm.api.plugin.authoring.AuthoringPlugin

Correct Answer: B

---

### QUESTION 3

Kellan wants to create a Breadcrumbs Navigator. To what should he set the start type?

- A. Selected
- B. Current Site Area

C. Current Top Level Site Area

D. Current Content

Correct Answer: B

#### QUESTION 4

Graham is a content developer. He has been tasked to create several forms for the Internet site for his company. He does not want to have to create a presentation template for every page that requires a form. How could he reduce the number of presentation templates needed to display the various forms for his Internet site?

A. Within his authoring templates, Graham could place a Text field. He could then select the HTML forms needed within the text field.

B. Within his authoring templates, Graham could place an Option Selection field. Then, he could create the HTML forms as separate HTML objects and reference them with the Option Selection fields of his content item.

C. Within his authoring templates, Graham could place a Link field. Then, he could create the HTML forms as separate HTML objects and reference them from the Link fields of his content item.

D. Within his authoring templates, Graham could place a Component Reference field. Then he could create the HTML forms as separate HTML objects and reference them from the Component Reference fields of his content item.

Correct Answer: D

#### QUESTION 5

The AT Printer Corp is a manufacturer of computer printers. They are building a new website using IBM Web Content Manager. The site contains pages that describe each of their product lines.

When content creators are creating a product content item, they are required to include one of five preformatted company slogans as a part of the content.

Which of the following actions can Jim, a developer, do to facilitate this requirement easily?

A. Jim creates an authoring template and adds all five slogans as HTML components to the authoring template. The HTML components are then referenced in an Option Selection element on the authoring template.

B. Jim first creates an Option Selection component in the Component library with all five slogans. Jim then adds this Option Selection component to the authoring template using Manage Elements.

C. Jim gives content creators the Contributor role on the authoring template. Content Creators can then use Manage Elements to add a new field to each content item for the slogan.

D. Jim first creates five HTML components in the Component library; one for each slogan. Jim can add a Component Reference element to the authoring template.

Correct Answer: D
