QUESTION 1

When a new blog is added to a page, a new library is created using the name supplied. Which library is used as the template for this new library?

- A. Web Content library
- B. Web Resources v70 library
- C. Blog Solo v70 library
- D. Blog v70 library

Correct Answer: C

QUESTION 2

Phil is creating a workflow to allow users to have content removed from the site once it is no longer valid. This is set by using the expire date field on the content item. His publish stage includes a scheduled move action to move the content to the expire stage on a given date, based on the general date 1 field. One of his content authors creates a content item that has a general date 1 field of the 5th of June, and an expiry date of the 12th of June.

Which of the following statements describes the behavior of this content item?

- A. On the 5th of June, the content item will move to the expire stage, and will be removed from the site
- B. On the 5th of June, the content item will stay in the publish stage as the expiry date has not been reached.
- C. On the 5th of June, the content item will move to the expire stage, but will not be removed from the site until the 12th of June.
- D. On the 12th of June, the content item will move to the expire stage and will be removed from the site.

Correct Answer: C

QUESTION 3

Mike is the content administrator and wishes to syndicate a library to a virtual portal. How does he best achieve this?

- A. He can set up a syndication relationship directly to the virtual portal, but only using the GUI interface.
- B. He can set up a syndication relationship directly to the virtual portal when creating the syndicator using either the GUI or the command line.
- C. He cannot syndicate to a virtual portal. He can only move content using import/export functionality.
- D. He can set up a syndication relationship directly to the virtual portal, but only using the command line interface.

Correct Answer: B

QUESTION 4

Meredith has been asked to set up an advanced search form. The search form should allow the users to search using the following IBM Web Content Manager metadata fields: AuthorsCategory Which of the following examples accomplishes this task?

A. Search Authors:
Search Category:

B. Search Authors:
Search Category:

C. Search Authors:
Search Category:

D. Search Authors:
Search Category:

Correct Answer: C

QUESTION 5

Cindy has assigned a custom workflow action to run when a project enters a specific state in a project. She can create a custom workflow action that could perform all the following actions except?

A. Automatically delete a project when it is successfully published.

B. Verify web standards compliance for all assets within the project including items that are not traditionally workflowed, such as components and presentation templates.

C. Automatically reject a project if it is in review for a certain period of time.

D. Automatically version a project when it is successfully syndicated.

Correct Answer: D
