D. The users must authenticate

Correct Answer: A

QUESTION 4

Which of the following statements describes the function of SSL?

A. SSL encrypts the database ahead of transmission by using a SOCKS proxy.

B. SSL encrypts the database by creating a certificate authority as a key ring.

C. SSL encrypts the transmission of HTTP by using the user\\'s ID as an encryption key

D. SSL encrypts the transmission of HTTP by using a registered certificate as an encryption key.

Correct Answer: D

QUESTION 5

Anna, who has developed traditional Lotus Notes application for years, is working on her first XPage application. Until now, she always tried to achieve goals by using as much @formulas as possible. Now she is asking her colleagues about @formulas with XPages. Which of the following answers is wrong?

A. Thomas said that there is no @formula language with XPages.

B. Marc explained that she can use most of the @formulas within JavaScript.

C. Adam told her that she can use @formulas, but some of them have different functionality.

D. Pete said that she can use @formulas, but because it is running inside JavaScript, @formulas are case sensitive, and instead of semicolons it uses commas to separate parameters.

Correct Answer: A
