QUESTION 1

Olivia is writing a Discussion application using XPages. She added a button on her main topic XPage to create a response document for this discussion. What should she do to generate the response document?

- A. Add a Create New Document simple action to the form QuerySave event
- B. Add a Create New Document simple action to the button onclick event
- C. Add a Create Response Document simple action to the button onclick event
- D. Add a Create Response Document simple action to the form QuerySave event

Correct Answer: C

QUESTION 2

Emma has upgraded her production Lotus Domino server from 7.0.4 to 8.5.2. Which new setting in the Server document should she be aware of, if she wants to run XPages securely?

- A. On the Internet Protocols tab, the HTTP setting is Enable as XPages server.
- B. On the Security tab, she should set the Sign applets and XPages to run on behalf of the invoker setting with the appropriate trusted IDs.
- C. On the Security tab, she should set the Sign agents or XPages to run on behalf of the invoker setting with the appropriate trusted IDs.
- D. On the Ports tab, click the Internet Protocols tab, and under Web, she should enable the Run XPages in HTTPS setting.

Correct Answer: C

QUESTION 3

Olga needs to integrate data from an Oracle database into her XPages application. Which of the following options would allow Olga to do that task?

- A. Nothing. Lotus Notes and Lotus Domino are able to access Oracle databases directly.
- B. DECS or LEI is installed and configured.
- C. Olga needs to install the EnterpriseDataConnection library from OpenNTF first.
- D. Unfortunately, there is no possibility to access Oracle data from an XPages application.

Correct Answer: B

QUESTION 4

Andre is using mail encryption on documents that are being routed to other members of his team. Which one of the following keys is used to decrypt the documents?

- A. Andre's private key
- B. Server's private key
- C. Recipient's public key
- D. Recipient's private key

Correct Answer: D

QUESTION 5

Sonia has been asked to rewrite her company's "Careers" Domino Web site using XPages. One of the benefits expected from the new development is better response time for the users. What is one reason why XPages may offer better performance versus earlier Domino Web sites?

- A. XPages are based on JSPs, which are faster than Domino HTML rendering.
- B. XPages are AJAX-enabled, which can offer response time improvements due to partial page refreshes.
- C. XPages avoid formula language, thereby saving the time incurred by the formula parser on the server.
- D. The custom controls that ship with XPages provide optimized widgets that may perform better than those developers could produce on their own.

Correct Answer: B
