QUESTION 1

A retailer recently upgraded their IBM Sterling Order Management from an older version to 9.1. While verifying the installation after the upgrade was completed, the resource manager found that the APIs were not returning data from the extended columns of product tables. The release manager believes the root cause to be a defective build process. Which aspect of the build process was defective?

A. The build process was not using the correct version of the JVM to compile the custom classes.

B. There is nothing wrong with the build process. Data from extended columns will not be carried over as part of an upgrade.

C. In order to view data from extended columns, custom classes following the "data access object" pattern have to be written and compiled as part of the build process.

D. The database extension xml was not present in the correct folder and hence the build process was not including it and did not detect any of the database extensions.

Correct Answer: D

QUESTION 2

Purge logs are being generated for every purge transaction and are taking up a large amount of space on the file system. The developer wants to change the path where the purge logs are being generated. Which file must the developer change?

A. sandbox.cfg

B. yfs.properties

C. app_overrides.properties

D. customer_overrides.properties

Correct Answer: D

QUESTION 3

While installing the IBM Sterling Selling and Fulfillment Suite in the GUI mode, the installation fails with an error indicating a user permission issue on the database schema. On researching the issue, it is discovered that the user has not been granted "CREATE TABLE" permission on the schema. The database administrator who can provide access is not accessible until the end of the week. Which statement is true regarding the application installation procedure?

A. The installation has to be rerun from the beginning after the permission has been granted to the user.

B. The IBM Sterling Selling and Fulfillment Suite should be re-installed with the option to use the database bundled along with it.

C. The installation can be run in a mode such that it does not connect to the database and the database scripts can be

run later when thepermission issue is resolved.

D. Since the issue is only a permissions issue, the installation can be run with a parameter in the silent file so it would ignore such errors andcomplete the installation successfully.

Correct Answer: C

QUESTION 4

The Item Bedroom Set has components Bed Set, Dresser Set and Entertainment Set. The Bed Set, Dresser Set and Entertainment Set are individual bundles in that Bedroom Set. Which Item Type does this Bedroom Set represent in IBM Sterling Selling and Fulfillment Suite?

A. Bundle

B. Package

C. Logical Kit

D. Physical Kit

E. Dynamic Physical Kit

Correct Answer: A

QUESTION 5

In a current implementation of IBM Sterling Selling and Fulfillment Suite, only default demand types are used. A sales order is created for an Item with a quantity of 10 and the order is in "Created" status. What will be the status of the inventory demand for this Item quantity 10?

A. RESERVED

B. ALLOCATED

C. OPEN_ORDER

D. FIRM_FORECAST

E. DEMAND_FOR_RELEASE

Correct Answer: C
