QUESTION 1

You are using the Complex Flat File stage as a source in your job.

What are two types of data specifically supported by the Complex Flat File stage for your job? (Choose two.)

- A. XML files.
- B. Mainframe data sets with VSAM files.
- C. Mainframe data files with DB2 tables.
- D. Data from files that contain Hadoop record types.
- E. Data from flat files that contain multiple record types.

Correct Answer: BE

QUESTION 2

You are assigned to correct a job from another developer. The job contains 20 stages sourcing data from two Data Sets and many sequential files. The annotation in the job indicates who wrote the job and when, not the objective of the job. All link and stage names use the default names.

One of the output columns has an incorrect value which should have been obtained using a lookup.

What could the original developer have done to make this task easier for maintenance purposes?

- A. Name all stage and links the same.
- B. Name all stages and links based on what they do.
- C. Indicate all stage names within the job annotation.
- D. Name all stage and links with column names and ideas.

Correct Answer: B

QUESTION 3

Which two statements about the Additional Connections Options property in the Teradata Connector stage to specify details about the number of connections to Teradata are true? (Choose two.)

- A. The default for requestedSessions is the minimum number of available sessions.
- B. The default for requestedSessions is the maximum number of available sessions.

- C. Requestedsessions is a number between 1 and the number of vprocs in the operating system.
- D. Sessionsperplayer determines the number of connections each player in the job has to Teradata.
- E. Total requested sessions equals sessions per player multiplied by number of nodes multiplied by players per node. The default value is 4.

Correct Answer: BD

QUESTION 4

The number of File Set data files created depends upon what two items? (Choose two.)

- A. Amount of memory.
- B. Schema definition of the file.
- C. Operating system limitations.
- D. Number of logical processing nodes.
- E. Number of disks in the export or default disk pool connected to each processing node in the default node pool.

Correct Answer: DE

QUESTION 5

Identify two items that are created as a result of running a Balanced Optimization on a job that accesses a Hadoop distributed file system as a source? (Choose two.)

- A. A JAQL stage is found in the optimized job result.
- B. A Big Data File stage is found in the optimized job results.
- C. A Balanced Optimization parameter set is found in the project
- D. A Balanced Optimization Shared Container is found in the project.
- E. A MapReduce Transformer stage is found in the optimized job result.

Correct Answer: AC
