QUESTION 1

What two approaches to use when determining fields to use for blocking?

- A. Investigate the combination of fields to assess block sizes.
- B. Selecting which field to use will have little impact on the matching results.
- C. Select fields with high data frequencies even if default values are present.
- D. Each field should be investigated to determine completeness and validity.
- E. Use as few fields as possible in the blocking phase so more records are grouped.

Correct Answer: BE

QUESTION 2

A major international financial firm has clients in over 35 countries, including the U.S. and Japan. A requirement exists to standardize all addresses and validate the U.S. and Japanese physical addresses.

How can this be accomplished?

- A. Use AVI to process all addresses within the single source.
- B. Use USAC to certify the U.S. addresses, AVI for the Japan addresses and custom rule sets for the remaining countries.
- C. Filter all the records by country. Use AVI for the U.S. and Japan and domain-specific rule sets for the remaining countries.
- D. Filter U.S., Japan and remaining countries into individual files. Process the U.S. and Japan addresses through AVI and use MNS for the remaining countries.

Correct Answer: A

QUESTION 3

Which statement is true regarding Quality Stage data survivorship?

- A. Survivorship is used to create groups of duplicate records.
- B. The Survive stage is used to mark records as possible duplicates.
- C. The Survive stage is used after matched record groups have been identified.
- D. The Survive stage can be used to correct and identify unhandled data from the Standardize stage.

Correct Answer: C

QUESTION 4

Which statement about the jobs used by the Match Specification Setup Wizard is true?

- A. The jobs must be created.
- B. The jobs must be imported.
- C. The jobs exist for only One-source individual match.
- D. The jobs are created in the repository at installation time.

Correct Answer: A

QUESTION 5

A transaction date field has format MM-DD-YYYY. The customer wants to see how many records contain a valid month in the transaction date field. Which mask type should be used in the Character Discrete investigation?

- A. TTXXXXXXXX
- B. CCXXXXXXXX
- C. CCTTTTTTTT
- D. TTCCCCCCCC

Correct Answer: D
