QUESTION 1

Which two properties files would be considered for changing the order of sections displayed on the Self Service User Interface and text of the actions within the sections displayed? (Choose two)

- A. SelfServiceScreenText.properties
- B. SelfServiceHomePage.properties
- C. SelfServiceLabels.properties
- D. CustomLabels.properties
- E. SelfServiceUI.properties

Correct Answer: AE

QUESTION 2

Which TWO of the following are valid recertification policy target types?

- A. Accesses
- B. Services
- C. Policies
- D. Groups
- E. Users

Correct Answer: BC

QUESTION 3

A IBM Tivoli Directory Integrator (ITDI) assembly line has been configured as the IBM Security Identity Manager (ISIM) identity feed. ISIM is setup to only accept connections over SSL using self-signed certificate. What must be done in order for ITDI to communicate with ISIM?

- A. ISIM's self-signed certificate will need to be imported as a trusted signer certificate in the ITDI certificate store.
- B. The ISIM default truststore will need to be updated before connections can be made.
- C. Since ITDI is a component of the ISIM solution no specific configuration is required.
- D. The service in ISIM will need to be configured for SSL.

Correct Answer: A

**QUESTION 4**

When gathering requirements for Organizational tree setup, which TWO entities are referenced?

- A. Admin Domain
- B. Organization
- C. Department
- D. Division
- E. Forest

Correct Answer: BD

QUESTION 5

A user is a member of two ISIM groups. Each group is a member in two separate Access Control Items (ACIs), ACI1 and ACI2 on Static Organizational Roles. Each group also has a separate UI View associated with it, called View1 and View2.

Which statement is correct in describing the access granted or denied to the user?

- A. The user will be able to create a static organizational role via the Java API if access to Create operation is granted in ACM and ACI2, and if View1 or View2 allow access to the Manage Roles task.
- B. The user will have access to create a static organizational role if its granted by ACI1 regardless of whether ACI2 grants, denies or provides none access to the Create operation.
- C. The user has a view of only the common tasks provided by both View1 and View2 in the ISIM Admin User Interface or ISIM Self Service User Interface.
- D. The user has a merged view of all the tasks provided by View1 and View2 in the ISIM Admin User Interface or ISIM Self Service User Interface,

Correct Answer: C
