QUESTION 1

What is the main purpose of the IBM Security Identity Manager (ISIM) recycle bin?

- A. To provide a quick failover mechanism if IBM Security Identity Manager LDAP fails
- B. To provide a ready-recoverability of inadvertently deleted objects
- C. To preserve a history of user IDs that have been used
- D. To enhance LDAP performance

Correct Answer: C

QUESTION 2

A functioning IBM Security Identity Manager (ISIM) test environment has been copied over to a production ISIM environment. Which of the following would validate the application is up and functioning correctly?

- A. Login to the application and perform a password change and verify the request is scheduled and completes successfully.
- B. Login to the WebSphere Administrative Console and validate the status of the ISIM application.
- C. Confirm the database instance for ISIM is running.
- D. Confirm the LDAP instance for ISIM is running.

Correct Answer: B

QUESTION 3

The client's IBM Security Identity Manager (ISIM) production environment consists of a two node IBM Websphere Application cluster. Server #1 has the Websphere Deployment Manager installed as well as one of the cluster nodes. Server #2 in the cluster just has the node installed. If a process monitor is being configured on Server #1 how many Java processes are there related just to Websphere?

- A. 4 - Deployment Manager process, Node process, Application Server process, Messaging Server process
- B. 1- Deployment Manager and Node processes run under a single Java process
- C. 3 - Deployment Manager process, Node process, Application Server process
- D. 2 - Deployment Manager process and Node process

Correct Answer: D

QUESTION 4

How should a reconciliation schedule be configured to ignore certain accounts and certain attributes for a service?

- A. Update a attribute exclusion list through the administrative console.
- B. Select what attributes to return from the available attribute list.
- C. Add a valid LDAP filter that will return the desired accounts.
- D. Add Java script to filter out accounts.
- E. Select supporting data only option.

Correct Answer: A

QUESTION 5

When using wsadmin to setup common reporting in ISIM 6, what is the command to save the current Configuration?

- A. wsadmin>AdminConfig.savecurrent()
- B. wsadmin>AdminConfig.save()
- C. wsadmin>Config.save()
- D. wsadmin> save

Correct Answer: B

Before you begin

Save the configuration by typing the following command: wsadmin> AdminConfig.save()

The IBM®Tivoli®Common Reporting server is configured to connect to your IBM Security Identity Manager database.
