QUESTION 1

When gathering requirements for workflows, which function uses workflows?

- A. Organization Tree development
- B. LDAP Adapter development
- C. Reconciliation development
- D. Lifecycle development

Correct Answer: D

QUESTION 2

An identity feed design for IBM Security Identity Manager (ISIM) makes use of IBM Tivoli Directory Integrator (ITDI) on Windows. What could be used to schedule the identity feed?

- A. Use the scheduler in WebSphere Application Server.
- B. Use the scheduler in IBM HTTP Server.
- C. Use Windows Scheduler.
- D. Setup cron job.

Correct Answer: B

QUESTION 3

After performing a successful test connection of an IBM Security Identity Manager (ISIM) 6.0 adapter service in ISIM, which of the following is information available on the "Status and Information" tab of the service?

- A. Adapter version, profile version, adapter memory usage
- B. Adapter version, number of disallowed accounts
- C. Profile version, number of orphan accounts
- D. Number of pending requests for the service

Correct Answer: B

QUESTION 4

What is the correct method for running the ISIM v6.0 installer in a windows environment?

- A. Visit the IBM Product Download site and install directly from this location

- B. Insert the product DVD. Select start-> run-> type "ISIM6install.exe"
- C. Enter the command "instlinux.bin" from the installation file directory
- D. Download the DVD image. Enter the command "instwin.exe"

Correct Answer: C

QUESTION 5

Which of the following is correct for `enrole.ui.pageSize` and `enrole.ui.maxSearchResults` properties?

- A. `enrole.ui.pageSize` controls the number of list items that is initially displayed on the screen, with more results made available in the UI with links to Page 2. Page 3. and so on. `enrole.ui.maxSearchResults` controls the maximum number of items returned for a search on one page. `enrole.ui.maxSearchResults` must always be less than or equal to `enrole.ui.pageSize`.
- B. `enrole.ui.pageSize` controls the maximum number of pages that will be displayed when a search query exceeds one page on the screen. `enrole.ui.maxSearchResults` controls the maximum number of items that are allowed as output of a search. If number of search results is larger than this then I SIM returns an error on the UI and terminates the request.
- C. `enrole.ui.pageSize` controls the default browser size (in pixels) that the web page opens to when the application is accessed. `enrole.ui.maxSearchResults` controls the maximum number of items returned for a search.
- D. `enrole.ui.pageSize` controls the number of list items that is initially displayed on the screen. `enrole.ui.maxSearchResults` controls the maximum number of items returned for a search.

Correct Answer: B
