-  **800,000+** Satisfied Customers

QUESTION 1

A company is evaluating how to implement single sign-on authentication in an HTTP-based environment. The goal is to allow them as service provider A to redirect to an outside service provider B and pass along information that proves the user is already authenticated.

Which specification most accurately addresses the requirement?

- A. WS-Trust
- B. WS-Security
- C. WS-Federation
- D. WS-Token

Correct Answer: C

QUESTION 2

At an organization, some standards-based technologies have been adopted around a J2EE application server. There is now a need to provide multi-channel access to existing service providers. Which product should be used for service connectivity in this design?

- A. WebSphere Message Broker
- B. WebSphere Service Registry and Repository
- C. WebSphere Enterprise Service Bus (ESB)
- D. DataPower SOA Appliance

Correct Answer: C

QUESTION 3

A Fortune 100 company is migrating its Enterprise Application Integration (EAI) architecture to SOA. The intent is to begin exposing its capabilities to business partners. The CIO is thinking about building a high speed, custom messaging solution so there is capacity for future growth. What should the SOA Designer say about the long-term implications of that direction?

- A. A custom messaging solution could provide performance advantages if development priority is allocated to provide standards-based connectors and adapters for business partners to connect.
- B. XML messages can be transformed at wire speed using Enterprise Service Bus (ESB) appliances like WebSphere DataPower SOA Appliance, so it is not necessary to be concerned with that part of the system's performance.
- C. Total cost of ownership will increase with custom middleware. Open standards-based commercial messaging

products are more interoperable, extensible, scalable, replaceable, and reliable than custom- built systems.

D. It will take a serious commitment to detailed technical support to make this happen. It is always a tradeoff between standards-based compliance and performance. The implementation of the custom messaging will need to provide serious performance advantages to business partners.

Correct Answer: C

QUESTION 4

An online bookseller wants to extend its reach by providing a Web service for pricing used books. The current internal Web application is hosted on a mainframe. The new service must provide the same capabilities and qualities of service to

external users.

What are the appropriate design patterns to use?

- A. Zoned Enterprise Service Bus (ESB) and As-is Host Application
- B. Zoned ESB and Exposed Application
- C. Self-Service and Exposed ESB Gateway
- D. Self-Service and As-is Host Application

Correct Answer: C

QUESTION 5

A new business process is being written that will call a number of new or existing Web services. As part of the SOA quality management process, which activity is the most appropriate?

- A. Test and validate that the Web services meet the Service Level Agreements (SLAs).
- B. Monitor and manage the service implementation platform.
- C. Monitor and manage the service availability.
- D. Provide an automated test platform for functional and regression testing.

Correct Answer: D
