QUESTION 1

A message flow without sequence requirement is deployed in an execution group EG1. With the growth of the business, the message transaction volume increases significantly. In order to increase the message throughput, an administrator: ?creates another execution group EG2. ?changes the message flow property Additional Instances to 3 using the Broker Archive editor. ?redeploys the message flow into the execution groups EG1 and EG2. How many threads can the broker use to service the message flow?

- A. 3
- B. 5
- C. 6
- D. 8

Correct Answer: D

QUESTION 2

An administrator needs to configure multi-instance WebSphere Broker environments that allow for the continued processing of already existing and new incoming messages at the messaging layer. What are the tasks required to configure a multi-instance broker on WebSphere Message Broker? Two network servers are to:

- A. operate in isolated cells to provide high availability (HA) linked using MQ Clustering for load balancing.
- B. be configured to host separate Logical Unit Number (LUN) for the work path for the multi-instance broker and queue manager.
- C. be configured to host shared work paths for the multi-instance broker and shared directories for the multi-instance queue manager(Active/Passive).
- D. be configured to host separate work paths on a shared file system for the multi-instance broker and queue manager to allow for isolated redundancy of each broker instance (Active/Passive).

Correct Answer: C

QUESTION 3

WebSphere Message Broker Version 7.0 has made it easier to use a high availability manager. The scripts to do this are now in the V7 Info Center, but were developed under a SupportPac. Which SupportPac?

- A. IC61
- B. IC63
- C. IC72
- D. IC91

Correct Answer: D

QUESTION 4

An administrator is notified by the developer that the WebSphere Message Broker Toolkit is crashing when debugging complex flows in a Windows XP machine. Which of the following files should the administrator request the developer to send to find more details about the error?

- A. \.metadata\log
- B. \.metadata\errors
- C. C:\Documents and Settings\All Users\Application Data\IBM\MQSI\log
- D. C:\Documents and Settings\All Users\Application Data\IBM\MQSI\errors

Correct Answer: A

QUESTION 5

An administrator needs to configure a property of the Broker SOAPListener to ensure that it will meet a new requirement. The property is not currently configurable. What action should the administrator take to meet this need?

- A. Open a Requirement.
- B. Open a Problem Management Report (PMR).
- C. Alter the config.xml of the Axis engine.
- D. Use the Admin API to update the execution group.

Correct Answer: A
