QUESTION 1

A BPM application developer needs to create a business process that will contain several human services. After development begins, the developer learns that some of the task participants could be defined by the internal IBM BPM security provider, while others could be defined in an external LDAP server.

How should the developer proceed in order to allow this mix of users to participate in the process?

The BPM application developer should:

- A. use only the external LDAP provider and recreate the internal users in the external LDAP server.
- B. use only the internal IBM BPM security provider and recreate the external LDAP users so that they are defined by the internal IBM BPM security provider.
- C. use either the internal IBM BPM security provider or the external LDAP provider, but not both. All users must exist in either the internal IBM BPM security provider or the external LDAP server.
- D. use the internal IBM BPM security provider in conjunction with the external LDAP provider. Create an IBM BPM security group and add the external LDAP users using the Process Admin Console.

Correct Answer: D

QUESTION 2

A document imaging and management company is implementing a business process diagram which requires a rules evaluation for the retention time of incoming documents. A BPM Analyst has requested that these rules be created using a natural language technology within IBM Business Process Manager V8.0.

What decision service component should the BPM application developer use to create these rules?

- A. BAL Rule
- B. Server Script
- C. Decision Table
- D. JRules Decision Service

Correct Answer: A

QUESTION 3

A BPM application developer needs to create an integration with an external system that has a WSDL available. The external system requires a user name and password as a digest for the authentication mechanism.

How can the BPM application developer achieve this requirement?

A. 1. Create an Integration Service and drag the "Java integration" from the palette to the canvas.

2.

Under Definition, select "SOAPMessageConnector" class and select the operation "Call Webservice with UsernameToken (Password in Digest)"

3.

Enter the User Credentials to be passed to the external system.

B. 1. Create an Undercover Agent.

2.

Under Implementation, discover/browse the WSDL and select the operation.

3.

Under Security, select the "UsernameToken (Password in Digest)" and enter the User Credentials to be passed to the external system.

C. 1. Create an Integration Service and drag the "Web Service integration" from the palette to the canvas.

2.

Under Implementation, discover/browse the WSDL and select the operation.

3.

Under Security, select the "UsernameToken (Password in Digest)" and enter the User Credentials to be passed to the external system.

D. 1. Create a Web Service.

2.

Under Implementation, discover/browse the WSDL and select the operation.

3.

Under Security, select the "UsernameToken (Password in Digest)" and enter the User Credentials to be passed to the external system.

Correct Answer: C

QUESTION 4

A BPM application developer is creating an "Order Management" process that needs to wait for inventory readiness status from a separate inventory application. If the received status is "ready", the process can resume its regular flow. If the received status is "not-available", the process needs to start a "Re-stocking" process flow. The application developer has exposed an inbound web service in IBM BPM to be called by the external inventory application.

How can the BPM application developer configure the process to allow the response from the incoming web service request to direct the flow of the process? Associate the inbound web service with:

- A. a service with a JavaScript invocation of an Ad-Hoc event in the "Re-stocking" process flow.
- B. a service with a JavaScript invocation of an Ad-Hoc event in the "Order Management" process.
- C. a service that invokes an Undercover Agent, and a receive message event on the "Re-stocking" process flow that is associated to the same Undercover Agent.
- D. a service that invokes an Undercover Agent, and a receive message event on the "Order Management" process that is associated to the same Undercover Agent.

Correct Answer: D

QUESTION 5

A company has stated that a supervisor search is required within a number of activities for their Office Requisition Process. A BPM application developer has chosen to implement this search within a coach view using AJAX. Refer to the variable declarations of the coach view below.

The configuration option retrieveSupervisors is of Type Service. Assuming that the AJAX function parameters are properly specified within the variable serviceArgs, how would the developer invoke the AJAX service within the appropriate coach view event handler?

- A. `this.context.options.RetrieveSupervisors(serviceArgs);`
- B. `this.context.options.retrieveSupervisors(serviceArgs);`
- C. `this.context.options.get("RetrieveSupervisors", serviceArgs);`
- D. `this.context.options.get("retrieveSupervisors", serviceArgs);`

Correct Answer: B
