QUESTION 1

A BPM application developer has been asked to develop a coach view that will be used to display request data on a user interface. Unfortunately the BPM application developer was only able to complete a portion of the implementation before handing it off to a fellow developer to complete.

The variable declaration is shown below:

What conclusions can the new BPM application developer draw after reviewing the variable declaration? Instances of the coach view will be notified when the attribute:

- A. field1 changes, with no additional configuration added to the implementation.
- B. field4 changes, with no additional configuration added to the implementation.
- C. city changes, if the coach view is manually bound to the city field using the bind() function in its load event handler.
- D. address changes, if the coach view is manually bound to request using the bindAll() function in its load event handler.

Correct Answer: C

QUESTION 2

A BPM application developer needs to create a coach view to meet the following requirements:

1.The coach view must be able to be used to build several user interfaces. 2.The coach view must be able to be used to create other coach views. 3.The contents of an html element must be updated when the view's data changes. What steps must the BPM application developer take in order to meet these requirements? Write code to intercept modifications to the view's data and place it in the:

- A. view event handler of the view instance and enable the view definition to be used as a template. A new coach view must be built using the template to support requirement 1.
- B. view event handler of the view definition and enable the view definition to be used as a template. The template coach

view can be used directly in coaches as well as other coach views.

C. change event handler of the view instance and enable the view definition to be used as a template. A new coach view must be built using the template to support requirement 1.

D. change event handler of the view definition and enable the view definition to be used as a template. The template coach view can be used directly in coaches as well as other coach views.

Correct Answer: D

QUESTION 3

A BPM application developer has built an integration service that executes SQL calls. Within this service, the BPM application developer makes use of the "SQL Execute Statement" service found within the TWSYS toolkit. Review the snapshot of the data mapping for this service. The BPM application developer wants to manage the "dataSourceName" value at runtime, instead of hardcoding the value "jdbc/BPMTEST".

Use default	Value	Output Type
<input type="checkbox"/>	tw.local.sql	sql (String)
<input checked="" type="checkbox"/>		parameters(List of S...
<input checked="" type="checkbox"/>		maxRows (Integer)
<input type="checkbox"/>	tw.local.params	returnType (String
<input type="checkbox"/>	"jdbc/BPMTEST"	dataSourceName (

Which features of IBM Business Process Manager V8.0 will allow the BPM application developer to do this? (Choose two)

- A. environment variables
- B. auto tracked variables
- C. localization resources
- D. shared process variables
- E. exposed process variables

Correct Answer: AE

QUESTION 4

Which statement correctly describes a type of service available in Business Process Manager V8.0?

- A. An Ajax service can be used to generate tasks in the IBM Process Portal user interface.
- B. An Integration service is the only type of service that can contain a Java or Web Service integration component.
- C. In addition to implementing business rules, Decision services are used for manipulating variable data.
- D. General System services are used to build custom functionality into the BPD for any non-supported service types.

Correct Answer: B

QUESTION 5

A BPM application developer has completed the development of a high profile process application and is now ready to deploy the solution into the test environment. The application developer has been told to allow one peer developer and the technical team lead to review and approve the work before it can be installed onto the test server. The application developer's manager has requested that the process of gathering these approvals be automated for auditing purposes.

What steps must the BPM application developer take in order to fulfill this requirement? The BPM application developer must:

- A. enable governance on the high profile process and use wsadmin to install the process.
- B. create a business process definition, inside of the high profile process application, to implement the approvals governance process.
- C. ask a user with the administrative authority to create a System Governance toolkit dependency to create a process application that will be used for governance.
- D. ensure that there is a task in the governance process that will allow a designated person to install the process, using Process Center, after all approvals have been received.

Correct Answer: C
