QUESTION 1

A developer is using a Worklight Studio installation that is configured with the Android 2.2 SDK and the corresponding Google USB driver. The developer has connected an Android device to the machine via a USB cable. The developer tries to run the application on the device but does not see the device listed as a target. What can be a cause for this issue?

- A. Worklight does not support testing on Android 2.2 devices.
- B. Installed Google USB driver is deprecated and must be explicitly enabled.
- C. Installed Google USB driver does not support the device connected to the machine.
- D. The worklight.properties file of the application is not configured to allow USB connection.

Correct Answer: C

QUESTION 2
