Correct Answer: B

QUESTION 3

The following changes are made to a Worklight mobile application: 1.Web resources of version 1 (v1) are updated and deployed to the Worklight Server. 2.A new version 2 (v2) is deployed with its updateSilently property set to true. What will be the direct update user experience on a device running v1 of the application when the user chooses to receive update?

- A. v1 is uninstalled first followed by a silent installation of v2.
- B. v1 web resources are updated first followed by a silent installation of v2.
- C. v1 web resources are reloaded after the update and the application remains on v1.
- D. The user is prompted to choose between updating v1 or installing v2 in the background.

Correct Answer: C

QUESTION 4

A developer has created a Worklight mobile application and wants to use the Android Virtual Device (AVD) emulator to test it. To accomplish this, the developer has installed the ADT plug-in, Android 4.0 SDK platform and created an

Android environment for the application. What else does the developer need to do before the AVD emulator can be used to test the application?

- A. Export the application's .apk file to AVD Manager.
- B. Use the AVD Manager to create an AVD for the Android 4.0 SDK platform.
- C. Set the android:minSdkVersion property to "4.0" in the application's AndroidManifest.xml file.
- D. No additional action is required. Worklight Studio automatically creates an AVD for the installed Android SDK platform.

Correct Answer: B

QUESTION 5
