QUESTION 1

A large z196 installation is exploring its new capability to manage a large number of I/O devices. Which of the following functions best addresses the requirement?

- A. Up to three subchannel sets per LCSS
- B. Increased system I/O bandwidth to 288GB/s
- C. Doubled Hipersockets to 32
- D. Fixed size HSA

Correct Answer: A

QUESTION 2

A System z customer is planning to move their data center with several existing System z servers to a new space without a raised floor. Which of the following requirements should the technical specialist discuss with the customer?

- A. Ordering the height reduction feature if needed
- B. Top Exit Cabling Option is required for all the CPCs
- C. Confirm all the System z servers are z9 BC, z10 BC or z114
- D. Confirm the new installation is compliant with the Installation Manual for Physical Plugging

Correct Answer: C

QUESTION 3

A customer is planning an upgrade to a z196 from a System z9. They still have a high number of ESCON I/O channels on the current machine. The customer has no immediate plans to migrate away from their ESCON attached I/O devices.

Which of the following actions should the Technical Specialist suggest?

- A. The customer should purchase ESCON to FICON convertors for each active ESCON port.
- B. ESCON channels are still supported on the System z196, no additional steps are required
- C. IBM Global Services may conduct a consolidation Analysis to help better understand the customer environment. IBM Global Services may conduct a consolidation Analysis to help better understand the customer environment.
- D. The customer must verify the number of active ESCON ports required. Fewer than 240 ports may be carried over on the z196. Additional ESCON ports require ESCON to FICON convertors.

Correct Answer: D

QUESTION 4

A customer has a Power with AIX server farm with network connectivity to a zEnterprise processor. Which of the following would represent a potential zBX opportunity for this customer?

- A. The customer wants to accelerate certain DB2 on zEnterprise queries.
- B. The customer wants to accelerate their DB2 on Power with AIX.
- C. The customer wants a stand-alone zBX with Power blades to free up floor space.
- D. The customer wants to move Linux virtual machines from the zEnterprise to a zBX so that the Linux applications can be closer to a Smart

Correct Answer: A

QUESTION 5

A customer has decided to modernize one of its main z/OS applications by using web technologies such as J2EE. Customer's cost studies indicate the only affordable platforms are based on distributed servers. What would be your best strategy to protect and grow System z?

- A. Create an offer based on Linux for System z for Application Development, System z Solution Edition for WebSphere and System z Solution Edition for Enterprise Management.
- B. Create an offer that addresses the total application lifecycle based on System z Solution Edition for Application Development, System z Solution Edition for WebSphere and additional management tools, as needed.
- C. Create an offer that addresses the total application lifecycle based on System z Solution Edition for Cloud Computing, adding development tools, WebSphere Application Server and additional management tools, if needed.
- D. Create an offer that addresses the total application lifecycle based on System z Solution Edition for Linux, System z Solution Edition for Application Development, System z Solution Edition for WebSphere and System z Solution Edition for Enterprise Management.

Correct Answer: B
