QUESTION 1

A customer has an installed TS3500 Tape Library with one L23 frame with only four TS1140 model drives. All are currently attached to open systems servers. The library and drives are being moved to another location and attached to a local

z/OS system.

Which additional hardware is essential at the new location to support four TS1140 drives?

- A. 3953-F05 with 3592-007
- B. 3952-F05 with 3592-007
- C. 3953-F05 with L05 Library Manager
- D. 3584-D23 with one Fibre Channel switch

Correct Answer: B

QUESTION 2

What provides a point-in-time view of the customer's tape data environment?

- A. GTE Trace
- B. QAM database copy
- C. EREP history file
- D. Tape Management Catalog

Correct Answer: D

QUESTION 3

In a TS3500 with ALMS enabled, which task can be completed by using the Tape Library Specialist Web interlace only, and not by using the operator panel?

- A. Creating or removing a logical library
- B. View or change the preferred zone of an accessory
- C. Disabling or changing the speed of the Ethernet link
- D. Installing licensed features of the library such as capacity on demand

Correct Answer: A

QUESTION 4

A customer has TS1120 tape drives used with an inventory of 200 JA cartridges and 200 JB cartridges, all currently written by the TS1120 drives at the highest density format. The customer plans to install TS1140 drives and move the data to new JO cartridges. How many new JC cartridges are required? Assume all cartridges are full to capacity, and round up the answer to the nearest cartridge if required.

- A. 50
- B. 60
- C. 75
- D. 82

Correct Answer: B

QUESTION 5

Which is the key benefit to be gained by adding the optional HA feature to a TS3500 Tape Library?

- A. Access time to data is halved
- B. Drives can be added non-disruptively
- C. Continued operation in case of failing accessory
- D. Simple library expansion by removing the service bay

Correct Answer: C
