QUESTION 1

To configure local configuration for a Web Agent, you use AllowLocalConfig = yes. Where do you set this parameter?

- A. In the Host Configuration File
- B. In the Agent Configuration File
- C. In the Hosts file on the web server
- D. In the local configuration file on the system hosting the web server

Correct Answer: B

QUESTION 2

User attribute mapping enables you to:

- A. map policies to different user attributes.
- B. map user groups to different administrator groups.
- C. map user classes to different user attribute names.
- D. map one common name to different user attribute names in different user directories.

Correct Answer: D

QUESTION 3

Which happens if you set the FCCCompatMode Agent parameter to YES?

- A. The Web Agent is unable to process impersonation requests.
- B. An extra redirect is needed during a form-based authentication.
- C. Form Authentication cannot be used in the mixed environment of v4.x agents.
- D. User authentication takes place at the Forms Credential Collector (FCC), where the response is triggered, but the text in the response is lost.

Correct Answer: B

QUESTION 4

Which cache reduces the number of calls the Agent needs to make to the Policy Server?

- A. Form Cache
- B. Agent User Cache
- C. Agent Resource Cache
- D. User Authorization Cache

Correct Answer: C

QUESTION 5

Which feature characterizes Policy Server clusters?

- A. They have a default failover threshold of 50%.
- B. They are defined as part of a Host Configuration Object (HCO).
- C. They include a secure network channel between all Policy Servers and the Monitor processes.
- D. For distributed monitoring, each Policy Server monitors all the other Policy Servers in the cluster.

Correct Answer: B
