QUESTION 1

If you are planning to implement custom menus, which factor should you consider?

- A. They cannot be used to open default dashboards.
- B. They are automatically deleted if all their associated user accounts are deleted.
- C. They are unavailable to users until an administrator edits a role to include the menu and assigns it to a user.
- D. They should be created by administrators for every user so that each dashboard a user needs is always readily available on one or more custom menus.

Correct Answer: C

QUESTION 2

When you configure tenant-aware monitoring using service tiers, you can configure change detection functionality. Why might you configure change detection?

- A. To define event thresholds
- B. To discover new devices in the monitored environment
- C. To configure how often the system checks for changes in device components
- D. To check collections have been added, changed, or removed from monitoring profiles

Correct Answer: C

QUESTION 3

When planning menus for dashboards, which guideline should you follow?

- A. Never add custom dashboards to a default menu.
- B. Share custom menus between tenants with similar needs.
- C. Use the Manage Menus page to organize dashboards in a meaningful way.
- D. If specific dashboards should not be available to a user, add them to a menu as a dimmed menu item.

Correct Answer: C

QUESTION 4

To log into a specific server and uninstall a Data Collector, which account do you use?

- A. Root

- B. Admin
- C. IT Operator
- D. Any user with access to the server

Correct Answer: A

QUESTION 5

In CA Performance Center, groups are organized in the Groups Tree. Which features characterize the Groups Tree? (Choose two)

- A. Its root level is called the Root Group node.
- B. It is used when an administrator manages groups.
- C. It includes the Defined Tenants sub-tree for groups in a tenant space.
- D. It includes a sub-node in the Defined Tenants sub-tree for Default Space groups.

Correct Answer: BC
