### QUESTION 1

When you are creating custom dashboards, which factors should you consider? (Choose three)

- A. Out-of-the-box templates are available to help you organize multiple views.
- B. The Add Dashboard button on the Available Dashboards page is visible to all users by default.
- C. If you need to display more than two views, best practice is to use multiple pages on your dashboard.
- D. The workflows for creating new dashboards and for customizing the out-of-the-box dashboards are essentially the same.
- E. Views are generally selected from the Custom View

Correct Answer: ADE

---

### QUESTION 2

When you are determining multi-tenancy requirements, which factors do you need to consider? (Choose three)

- A. Roles and users
- B. Collection model
- C. Metric family support
- D. Vendor certification priority
- E. Inventory discovery and monitoring behavior

Correct Answer: ABE

---

### QUESTION 3

Which guidelines should you follow for the metric family definition XML file? (Choose two)

- A. Add a version number to the file name.
- B. Use the MetricFamilyXML file on the Data Aggregator server as a starting point.
- C. Make no changes to content within the tag of your XML file.
- D. Use the metric family in a test environment first, because you will be unable to make changes after you import the XML file to the Data Aggregator.

Correct Answer: AD

---

#### QUESTION 4

When planning menus for dashboards, which guideline should you follow?

- A. Never add custom dashboards to a default menu.
- B. Share custom menus between tenants with similar needs.
- C. Use the Manage Menus page to organize dashboards in a meaningful way.
- D. If specific dashboards should not be available to a user, add them to a menu as a dimmed menu item.

Correct Answer: C

---
