QUESTION 1

A financial services company plans to move its existing CRM system into the cloud. The current system hosts 50 million customers. Which of the following steps should be done FIRST for moving this application into the cloud?

- A. Perform security testing of the application to ensure that there are no new security vulnerabilities being introduced.
- B. Perform testing to confirm that all the customer data can be mapped/migrated during the allocated change window.
- C. Communicate with customers that they will be moving to a new CRM system which will be hosted in the cloud.
- D. Perform a physical site assessment on where the application is hosted to ensure adequate controls are in place.

Correct Answer: A

QUESTION 2

When an organization moves to a cloud service for IaaS the cost model changes. Which of the following illustrates that cost model?

- A. Move from an ongoing OPEX model for infrastructure to an ongoing service charge for the life of the infrastructure
- B. Move from a depreciation model of infrastructure to a leasing model of infrastructure with bundled support and maintenance.
- C. Move from a CAPEX model for infrastructure to an ongoing OPEX charge with bundled support and ongoing maintenance.
- D. Move from an OPEX model for infrastructure to an ongoing CAPEX charge with bundled support and ongoing maintenance.

Correct Answer: C

QUESTION 3
