QUESTION 1

Which of the following is NOT a part of the Public Switched Telephone Network (PSTN)?

- A. Trunking
- B. Switching
- C. Access
- D. Transmission

Correct Answer: A

QUESTION 2

Which of the following standards defines call transfer supplementary service?

- A. H.450.3
- B. H.450.2
- C. H.450.1
- D. H.450.4

Correct Answer: B

QUESTION 3

John works as a Network Administrator for Infonet Inc. The company has a Windows 2000 domainbased network. The network has ten Windows 2000 servers and 300 Windows 2000 Professional client computers. The network uses a T3 line to connect to the Internet. The company also has 1,000 external employees who need to connect to the company from remote locations. John wants to implement a remote access policy for external users, which will make access highly available and most secure.

He wants to accomplish the following goals:

I No data traffic should be carried as clear text.

I At least 200 remote users should be able to access the network simultaneously all the time.

What will he do to accomplish these tasks? Each correct answer represents a part of the solution. Choose three.

- A. Configure each VPN server to support 150 PPTP connections.
- B. Configure the client computers to use MS-CHAP.
- C. Configure the client computers to use Password Authentication Protocol (PAP).
- D. Install two virtual private networking (VPN) servers at the main office.

Correct Answer: ABD

QUESTION 4

Which of the following OSI layers is responsible for a reliable connection between two hosts on a TCP/IP network?

- A. Data-Link layer (layer 2)
- B. Session layer (layer 5)
- C. Physical layer (layer 1)
- D. Network layer (layer 3)
- E. Transport layer (layer 4)

Correct Answer: E

QUESTION 5

Which of the following layers of the OSI model ensures that messages are delivered in the order in which they are sent, and that there is no loss or duplication?

- A. Transport layer
- B. Physical layer
- C. Presentation layer
- D. Session layer

Correct Answer: A
