QUESTION 1

The following hierarchy has been created:

Before executing the dimension build, the developer wants to ensure that duplicate rows are excluded from each hierarchy level. If any duplicates are encountered, the developer only wants to keep the row from DataSource1. The data sources will be executed in series. What should be done?

- A. Create a data integrity lookup for the hierarchy that will flag duplicate rows at each level.
- B. Specify that duplicate rows are to be rejected on the Audit tab of the dimension build's properties.
- C. Modify the SQL statement for the dimension build to use the SELECT DISTINCT clause.
- D. Specify that duplicate rows are to be rejected on the Features tab of the hierarchy's properties.

Correct Answer: D

QUESTION 2

Incoming fact data includes an audit reference column for each row. This column has been identified as an attribute in the transformation model. When executed, the fact build should designate this element as a key in the resulting fact table. This fact table will be created (not updated) by the fact build. What should the developer do?

- A. Convert the attribute element into a derived dimension element.
- B. Specify the column as a key in the table delivery properties.

- C. Specify the column as a key in the data source properties.
- D. Convert the attribute element into a derivation element.

Correct Answer: B

QUESTION 3

A developer has geographical data from a data source where cities roll up into states, and states roll up into regions. What should the developer create in order to allow Data Manager to aggregate fact data to the region level?

- A. Derived dimension
- B. Lookup
- C. Derivation
- D. Hierarchy
- E. Dimension

Correct Answer: D

QUESTION 4

A JobStream has been created that, when executed, will write status messages to the log file that indicate whether nodes have completed or failed to run. What type of node should be added to the JobStream?

- A. Alert
- B. Condition
- C. Procedure
- D. Email

Correct Answer: C

QUESTION 5

During execution, a fact build generated the following messages in the log file:

```
[INTERNAL - 11:14:05]Hash: 118 page(s), 135173 of 150000 slots  
in use (90%), 0 reusables, avg 2.56 hits  
[INTERNAL - 11:14:05]Hash: table full, restructuring  
[INTERNAL - 11:14:05]Hash: resizing table from 15000  
[INTERNAL - 11:14:05]Hash: table restructuring complete
```

What can be done to avoid seeing the last three lines when the build is executed again?

- A. Increase the initial size of the hash table.
- B. Decrease the size of the page pool.
- C. Disable audit logging.
- D. Increase the amount of working memory (in megabytes).

Correct Answer: A
