QUESTION 1

In Framework Manager, which of the following will have a positive impact on query performance without intervention from an author?

- A. Create stand-alone filters.
- B. Add performance indicators to functions.
- C. Configure data sources in a project pointing to the same database instance to use the same connection.
- D. For a query item having an integer data type, set the Display Item Reference property to display an integer value.

Correct Answer: C

QUESTION 2

What does a star schema database structure typically consist of?

- A. De-normalized hierarchy of dimension tables and fact tables.
- B. Normalized dimension tables and detailed fact tables.
- C. Normalized dimension tables and summarized fact tables.
- D. De-normalized dimension tables and fact tables.

Correct Answer: D

QUESTION 3

In Framework Manager, why is it recommended that modelers alter the default all- inclusive select statements of data source query subjects as little as possible?

- A. To generate the most efficient SQL at run time and simplify model maintenance.
- B. To prevent the exclusion of columns from a table that may be required in future reports.
- C. To prevent improperly constructed SQL and reduce issues with model documentation and readability.
- D. To provide authors with access to all columns in a databasetable which reduces requests to the modeler?

Correct Answer: A

QUESTION 4

In Framework Manager, which of the following statements is correct when working with a multi- lingual project?

- A. The design language can be changed at any point.
- B. A project language cannot be deleted once defined in Framework Manager.
- C. A language must be added to the project before it can be published with a package.
- D. When a new language is added to a project, all locales for that language are added as well.

Correct Answer: C

QUESTION 5

Which of the following statements is correct regarding the implementation of object security in Framework Manager?

- A. Groups and roles can be created in the Cognos namespace when specifying access to objects.
- B. Even when object security is applied, if anonymous access is configured, every object in a Framework Manager project is visible to everyone.
- C. A user belongs to two groups. One of the groups is denied access to an object. The other group is granted access to the object. The result is that user has access to the object.
- D. Granting access to an object for one user, group or role (except the Everyone and All Authenticated Users groups), implicitly denies access to that object for all other users, groups or roles.

Correct Answer: D
