-  **800,000+** Satisfied Customers

### QUESTION 1

As a consultant, you have been hired by ABC Company to implement an outdoor WLAN connection between two buildings that are 2 kilometers (1.24 miles) from each other, with no obstructions in between.

Your first required objective is to create a point-to-point link between the two buildings within the local regulatory body's 800 mW EIRP maximum.

Your second required objective is to provide an industry-standard security solution capable of supporting mutual authentication.

As an optional objective, you must minimize the amount of interference from, and to, nearby WLAN networks.

You install an OFDM wireless bridge at each building, configuring one in root mode and the other in non-root mode. You set each radio for 100 mW (20 dBm) and attach 9 dBi omnidirectional antennas to both. You configure the network for WPA2-Enterprise with PEAPv0/EAP-MSCHAPv2 authentication.

Which statement is true about the solution you chose to deploy?

- A. Your solution meets both required objectives and the optional objective.
- B. Your solution meets the second required objective and the optional objective, but not the first required objective.
- C. Your solution meets neither required objective but meets the optional objective.
- D. Your solution meets both required objectives, but does not meet the optional objective.

Correct Answer: D

---

### QUESTION 2

The center frequency of channel 1 in the 2.4 GHz band is 2.412 GHz (2412 MHz).

What is the center frequency of channel 4?

- A. 2.413 GHz
- B. 2.417 GHz
- C. 2.422 GHz
- D. 2.427 GHz
- E. 2.437 GHz

Correct Answer: D

---

### QUESTION 3

What features are most often configurable within 802.11 WLAN client utilities? (Choose 2)

- A. Frame generator utility
- B. Power management
- C. Co-channel interference threshold
- D. AESkey and block size

Correct Answer: BD

---

#### QUESTION 4

You are selecting antennas for a WLAN operating in the 5 GHz frequency band. What specifications should be evaluated for an antenna before it is implemented in this WLAN system? (Choose 3)

- A. 802.11ad compatibility
- B. TPCsupport
- C. Impedance in Ohms
- D. Elevation Beamwidth
- E. Return Loss Rating
- F. Operating Frequencies

Correct Answer: CDF

---

#### QUESTION 5

You are using a tool that allows you to see signal strength for all APs in the area with a visual representation. It showsyou SSIDs available and the security settings for each SSID. It allows you to filter by frequency band to see only 2.4 GHz networks or only 5 GHz networks. No additional features are available. What kind of application is described?

- A. Site survey utility
- B. Protocol analyzer
- C. Spectrum analyzer
- D. WLAN discovery tool

Correct Answer: D
