QUESTION 1

What catch-phrase best describes SAP's software maintenance strategy?

- A. "3-3-1 maintenance"
- B. "4-2-2 maintenance"
- C. "5-1-2 maintenance"

Correct Answer: C

QUESTION 2

How many spool work processes can be configured for each SAP instance?

- A. More than one spool work process can be configured for each SAP instance.
- B. The number of spool processes has to be equal to the number of background processes.
- C. Only one spool work process can be configured for each SAP instance.

Correct Answer: A

QUESTION 3

For an AS ABAP, the connection to an LDAP Directory can be configured. Which of the following statements are true? (Choose three)

- A. The main configuration of an LDAP connection is done using the transaction LDAP.
- B. In AS ABAP, there is a report available which can enhance the LDAP schema of different LDAP providers.
- C. SAP trusts the LDAP user management. Therefore, the users cannot be maintained anymore in the transaction SU01.
- D. Technically, the connection is done using the operating system program ldap_rfc.

Correct Answer: ABD

QUESTION 4

Which of the following are repository objects in an AS ABAP-based SAP system? (Choose two)

- A. Programs
- B. Buffer areas
- C. Screens (Dynpros)

D. Client-independent customizing settings

Correct Answer: AC

QUESTION 5

Which statement regarding remote printing with SAP NetWeaver AS ABAP is correct?

- A. If you want to configure remote printing for an output device, you need to choose access method C for Windows operating systems.
- B. If you want to configure remote printing for an output device, you have to choose access method R in every case (on all operating systems).
- C. If you want to configure remote printing for an output device, you can use access methods U and S, depending on your operating system.

Correct Answer: C
