What features related to process orders can be used to fulfill Good Manufacturing Practices (GMP) requirements? (Choose three)

- A. Availability check
- B. Digital signature
- C. Resource selection
- D. Electronic batch record
- E. Approved master recipes

Correct Answer: BDE

QUESTION 3

A material was planned in the context of SAP ECC material requirements planning. The MRP controller subsequently processed the material by manually converting a specific planned order into a production order. The MRP controller now accesses the current stock/requirements list and the MRP list for this material and compares these two lists.

Which of the following statements are true for the two lists at this stage? (Choose two)

- A. The MRP list displays the production order.
- B. The stock/requirements list displays the production order.
- C. The stock/requirements list was updated at the precise time it was accessed.
- D. The MRP list has the status "processed".

Correct Answer: BC

QUESTION 4

What can you use to organize material staging for production orders? (Choose three)

- A. Transfer orders
- B. Logistics Information System (LIS)
- C. KANBAN
- D. Material documents
- E. Pull list

Correct Answer: ACE

QUESTION 5

Which of the following activities is necessary for the capacity availability check to be carried out automatically when a production order is released?

- A. Activate the availability check and assign an overall profile in checking control for the business function order release.
- B. Assign an appropriate availability checking rule to the material master for the product.
- C. Activate the availability check and assign an overall profile in the production scheduling profile.
- D. Set the finite scheduling indicator and assign a checking rule in the work center for the operation to be checked.

Correct Answer: A
