QUESTION 1

Which statement best describes the advantage of using AfterReturning advice, rather than simply using after advice? (Select one)

A. If an exception is thrown in the join point, it is allowed to propagate, which is not the case with After advice

B. AfterReturning advice is invoked if an exception is thrown, which is not the case with After advice

C. After advice can only be applied to methods which are declared as void

D. AfterReturning advice is only invoked if the method returns successfully, allowing you to limit advice to only those scenarios

Correct Answer: D

QUESTION 2

Which of the following statements best describes the After Returning advice type? (select one)

A. After Returning advice allows behavior to be added after a method either returns successfully or throws an exception

B. Custom processing can be performed before a join point executes

C. The advice has complete control over the method invocation

D. The advice is invoked only if the method returns successfully

Correct Answer: D

QUESTION 3

Which of the following statements about the BeanFactoryPostProcessor are true? (select one or several answers)

A. Allows for the transformation of Spring bean definitions before the beans are instantiated

B. Allows for the transformation of Spring beans after the beans have been instantiated

C. Detects annotations such as @PostConstruct and @PreDestroy and then invokes appropriate behavior

D. The tag causes a BeanFactoryPostProcessor to be created

Correct Answer: AD

QUESTION 4

@Configuration

public class AppConfig {

@Bean

public ClientService clientService() {

ClientServiceImpl clientService = new ClientServiceImpl();

clientService.addClientDao(new ClientDao());

return clientService;

}

In the example above, which statement is NOT true with regards to Spring Java configuration? (select one)

A. The declared bean is a singleton by default

B. This bean might be wrapped by a proxy

C. This bean cannot use a method starting with "add" to inject a dependency

D. The bean is of type ClientService

Correct Answer: C

QUESTION 5

Which of the following statements is NOT true concerning the BeanPostProcessor Extension point? (Select one)

A. BeanPostProcessors are called during the init phase

B. BeanPostProcessors are called after the dependencies have been injected

C. BeanPostProcessors are called before the BeanFactoryPostProcessors have been called

D. Custom BeanPostProcessors can be implemented

Correct Answer: C
