Following Questions and Answers are all new published by SpringSource Official Exam Center

QUESTION 1

Which statement is NOT a characteristic of Spring\\\'s PlatformTransactionManager base interface (select one)

A. When declaring a PlatformTransactionManager implementation inside Spring configuration: as a requirement, the bean id should be "transactionManager"

B. The PlatformTransactionManager interface abstracts the differences between local and JTA transactions

C. There are various implementations of JTA transaction managers for different Java EE containers

D. PlatformTransactionManager is used in both declarative and programmatic transaction management

Correct Answer: A

QUESTION 2

Method level security can be configured using which of the following mechanisms? (select one)

A. Using the @Secured annotation on methods to be secured

B. Using the @RolesAllowed annotation on methods to be secured

C. Configuring using a pointcut expression in Spring XML configuration file

D. All of the above

Correct Answer: D

QUESTION 3

If the propagation behavior is Propagation.REQUIRES_NEW, choose the statement which describes the propagation behavior (select one)

A. Runs in a nested transaction if an active transaction exists. If an active transaction does not exist, the transaction behaves as if Propagation.REQUIRED is set

B. Supports a transaction if one already exists. Throws an exception if an active transaction does not exist.

C. Always starts a new transaction. If an active transaction already exists, it is suspended

D. Always executes without a transaction even if an active transaction exists. Throws an exeception if an active transaction exists.

Correct Answer: C

QUESTION 4

What is the primary purpose of bean definition inheritance? (Select one or several answers)

A. To configure Java class inheritance dynamically within the XML bean definition file

B. To reduce the amount of configuration required by inheriting properties from other bean definitions

C. To allow Spring beans to be created on the fly from classes declared as abstract

D. To simplify configuration by allowing multiple properties files to be loaded in a hierarchy to specify bean properties

Correct Answer: B

QUESTION 5

Which of the following methods is NOT provided by the JmsTemplate? (select one)

A. setDefaultDestination

B. onMessage (asynchronous call)

C. convertAndSend

D. receiveAndConvert (synchronous call)

Correct Answer: B
