QUESTION 1

Spring's RMI Service Exporter provides which of the following services? (select one)

- A. Transparently exposes an existing POJO service to the RMI registry
- B. Avoids the service interface having to extend Remote
- C. Exposes services that can be accessed via plain RMI
- D. All of the above

Correct Answer: D

QUESTION 2

Which of the following statements is NOT true concerning Setter Injection or Constructor Injection? (Select one)

- A. Constructor injection is useful when you must have an instance of a dependency class before your component is used
- B. Setter injection is useful if a component can provide its own defaults
- C. Using the @Autowired annotation, setter injection also works when the setter method is private
- D. Using setters promotes immutability

Correct Answer: D

QUESTION 3

Which of the following statements defines a "pointcut"? (select one)

- A. A point in the execution of a program such as a method call or field assignment
- B. A module that encapsulates advices
- C. An expression that selects one or more join points
- D. None of the above

Correct Answer: C

QUESTION 4

Which of the following statements defines an "aspect"? (select one)

- A. An encapsulation of advice combined with a pointcut.

- B. A point in the execution of a program such as a method call or field assignment
- C. An expression that selects one or more join points
- D. Code to be executed at a join point that has been selected by a Pointcut

Correct Answer: A

QUESTION 5

Assuming a web application context name of "rewardsonline", a servlet mapping of "/admin/*", and an incoming URL of "/rewardsonline/admin/accounts/show", what is the URL used for Spring MVC request-mapping purposes? (select one)

- A. /rewardsonline/admin/accounts/show
- B. /admin/acounts/show
- C. /accounts/show
- D. /show

Correct Answer: C
