#### QUESTION 1

What would you describe is a key characteristic of cloud platform as a Service (PaaS)?

- A. Direct control over the underlying infrastructure
- B. Cloud hosted integrated development environment
- C. Home-grown programming environment
- D. Cloud hosted, in house built tools

Correct Answer: B

---

#### QUESTION 2

After virtualizing an x86 server workload, users report that a custom application is performing poorly. You investigate the issue and find that the resources on the host do not appear to be constrained. However, you discover that the application on the guest operating system has an abnormally high number of context switches.

What should you do to resolve the issue?

- A. Deploy additional hosts
- B. Move to a Type 2 hypervisor
- C. Use software-assisted virtualization
- D. Turn on hardware virtualization in the BIOS

Correct Answer: D

---

#### QUESTION 3

What is needed to transform a VDC into IaaS?

- A. Metering processes, self-service portal, service catalog
- B. Self-service portal, pay-as-you-go
- C. Metering processes, multi-tenancy, termination agreements
- D. Pay-as-you-go, service catalog

Correct Answer: A

---

#### QUESTION 4

Which is an example of horizontal scaling a virtual application?

- A. Database virtual server with a standby replica on the same physical server
- B. Web server farm with four virtual servers and one physical server
- C. Database virtual server with a standby replica on another physical server
- D. Web server farm with four virtual servers deployed across four physical servers

Correct Answer: D

---

#### QUESTION 5

Which mode of IPSec encrypts the entire IP packet?

- A. Tunnel
- B. Transport
- C. Transparent
- D. Trusted

Correct Answer: A
