QUESTION 1

A small law firm that does not currently have any virtualization technologies implemented has recently merged with another firm of approximately the same size. They are planning to consolidate into a single location. They have decided to virtualize their servers and they would like to consolidate storage. It has been determined that 80% of the file server data has not been accessed in over 90 days.

What can they implement to achieve higher storage efficiency?

- A. A file archiving plan, to leverage inter-array storage tiering
- B. Quotas, to limit the amount of capacity users or groups can consume
- C. File extension filters, to prevent non-business related data from being stored in home directories
- D. Vertical storage tiering, to ensure data is placed on the appropriate drive technology

Correct Answer: A

QUESTION 2

Refer to the exhibit.

Application Group	I/O Rate	I/O Bursts	Capacity
Group 1	High	No	Low
Group 2	Medium	Yes	Medium
Group 3	Low	Yes	High

You are designing the storage environment for a new VDC. The applications have been classified into three groups, as shown in the exhibit. You have chosen to create a storage pool for each application group.

How should you configure the storage for each pool to meet the performance and capacity requirements, while minimizing costs?

- A. Pool 1 - SSD and SAS drives with storage tieringPool 2 - SAS and NL SAS drives with storage tiering and cache tieringPool 3 - SAS and NL SAS drives with storage tiering and cache tiering
- B. Pool 1 - SSD and SAS drives with storage tieringPool 2 - SSD and NL SAS drives with storage tieringPool 3 - SAS drives with cache tiering
- C. Pool 1 - SSD and SAS drives with storage tieringPool 2 - SAS and NL SAS drives with storage tiering and cache tieringPool 3 - NL SAS drives with cache tiering
- D. Pool 1 - SSD and SAS drives with storage tiering and cache tieringPool 2 - SAS and NL SAS drives with storage tiering and cache tieringPool 3 - NL SAS drives with cache tiering

Correct Answer: C

QUESTION 3

Why is it important to identify business objectives prior to planning and designing a virtual infrastructure?

- A. IT objectives are the same as business objectives
- B. IT objectives drive business objectives
- C. IT objectives are linked to business objectives
- D. Business objectives are a higher priority than IT objectives

Correct Answer: C

QUESTION 4

When using logging to maintain server security, which is the key element for intrusion detection and should be contained the server logs?

- A. Vulnerability scan that identifies susceptible services that are active on the server.
- B. Results of penetration testing through uncover problem probable weaknesses.
- C. An entry for each application transaction with details of the organization.
- D. Alerts to suspicious activities that require further investigation.

Correct Answer: D

QUESTION 5

What are the four key areas reported on a scorecard used to compare the assessments of internal IT to Service Providers?

- A. Security, Privacy, Service Levels, Audit
- B. Security, Compliance, Privacy, Service Levels
- C. Security, Compliance, Cost, and Business Stability
- D. Security, Compliance, Governance, and Risk

Correct Answer: A
