QUESTION 1

Which statement is true about installing a Composer Project in a repository?

- A. Multiple Projects can co-exist in a single repository.
- B. Previously installed Projects must be uninstalled first.
- C. Previously installed Projects are automatically uninstalled.
- D. The Project cannot be installed in more than one repository managed by the same Content Server.

Correct Answer: A

QUESTION 2

When checking in a document through Webtop, which option can be set?

- A. Change permissions
- B. Specify folder location
- C. Change document type
- D. Subscribe to the document

Correct Answer: D

QUESTION 3

Which statement about DQL is true?

- A. DQL is a scripted language used to customize Documentum client UIs.
- B. DQL is a compiled language that executes faster than SQL on Oracle databases.
- C. DQL is a more precise language than SQL and therefore returns a more precise set of results.
- D. DQL inherently understands repository objects, versions and permissions in addition to RDBMS tables and rows.

Correct Answer: D

QUESTION 4

Which condition(s) must be met to limit a search to a particular space in CenterStage?

- A. The search expression must be entered in the CenterStage toolbar Search field. The "Search in my extra sources" option must be unchecked in the fly-out panel.

B. The search expression must be entered into the Search field in the CenterStage toolbar using xPlore syntax to specify the space.

C. The space must be open. The search expression must be entered in the CenterStage toolbar Search field. The "Search in my extra sources" option must be unchecked in the fly-out panel.

D. The space must be open. The search expression must be entered in the "Search and filter content" field on the Search tab of the space.

Correct Answer: D
