### QUESTION 1

A customer is using SRDF/S with one Symmetrix VMAX in each data center. An application is doing 10,000 4 KB IOPS with 40% writes and is using multiple volumes. Assume an RA port can handle a maximum of 4,000 4 KB IOPS.

Based on best practices, how many RAs are needed for this application?

- A. 1
- B. 2
- C. 4
- D. 8

Correct Answer: B

---

### QUESTION 2

A customer wants data from a source to be copied to its TimeFinder/Clone target as soon as the session is created. Which option needs to be used when creating the TimeFinder/Clone session?

- A. precopy
- B. copy
- C. establish
- D. differential

Correct Answer: A

---

### QUESTION 3

A customer has purchased a new VMAX and is in the process of setting up Open Replicator for a migration. What is a consideration for device pairing for the migration?

- A. New devices must be of the same RAID type.
- B. New Device must be the same size or smaller.
- C. New Device must be of the same Meta Configuration.
- D. New device must be the same size or larger.

Correct Answer: D

---

### QUESTION 4

What is a characteristic of the FAST policy as defined by the analysis done by Tier Advisor?

- A. Tier Advisor policy elements are set statically and sum to an aggregate of 100%
- B. Tier Advisor policy is dynamic and applies directly to the FAST policy to be set on the Symmetrix
- C. Tier Advisor sets the VP policy statically for the baseline only; the policy must be adjusted manually for each defined policy
- D. Tier Advisor and FAST VP policies both allow 100% allocation per tier

Correct Answer: A

---

#### QUESTION 5

A storage administrator receives a warning message that one of the thin pools in the Symmetrix is low on storage space. The pool contains a large number of thin devices that have been fully preallocated but have small amounts of used space. What is the least disruptive and most cost effective way to make more thin pool space available?

- A. Run zero space reclamation on the thin devices
- B. Add more data devices to the thin pool
- C. Unbind the underutilized thin devices from the pool
- D. Rebalance the pool

Correct Answer: A
