QUESTION 1

A customer has an EMC Centera located on network A and an application server located on network B, with the two networks connected via the Internet. Which feature should be enabled to allow communication from the application server located outside of the local private network?

- A. DHCP
- B. FQDN
- C. ICMP
- D. NAT

Correct Answer: D

QUESTION 2

The principle cluster node in an EMC Centera fails and remains offline. How will a new principle cluster node be assigned?

- A. Highest online System ID
- B. Lowest online System ID
- C. Next highest node number in the cube
- D. Next lowest node number in the cube

Correct Answer: B

QUESTION 3

You have questions regarding file systems and alerts you have received. You want support to dial in to your Dell 2950 CUA directly via a modem. What must you do to allow this?

- A. Log in as gwsetup, go to bash prompt, and issue /usr/sbin/modem enable
- B. Log in as gwsetup, go to bash prompt, and issue sudo /usr/local/storigen/set_serial_mode modem
- C. Log in as gwsetup, go to configuration options, select Toggle modem
- D. Nothing, the modem connection is enabled

Correct Answer: B

QUESTION 4

A customer implemented an EMC Centera and performed acceptance testing by writing 4 TB of data to the EMC

Centra. After acceptance testing is complete the customer successfully issued delete calls to all the data. The next day the customer observes that the free space on the EMC Centra has NOT significantly changed after the deletion.

How is this possible?

- A. A purge command must be issued to reclaim the space
- B. Garbage collection has not yet swept the data
- C. Reflections have consumed the space
- D. Retention has been set

Correct Answer: B

QUESTION 5

When planning a migration which tool should be used to calculate the time needed to migrate the customer's data?

- A. C2C Projection Reporter
- B. EMC Centra Viewer Built in Replication Calculator
- C. Integrity Check report
- D. LOE Estimation tool

Correct Answer: D
