#### QUESTION 1

What is the EMC-recommended cache page size for Microsoft Exchange 2007 environments?

- A. 4 KB
- B. 8 KB
- C. 12 KB
- D. 16 KB

Correct Answer: B

---

#### QUESTION 2

What should be done prior to manually stopping a SnapView session that is running?

- A. Save all memory mapping entries to the COFW log.
- B. Flush the host buffers and deactivate the snapshot.
- C. Remove the source LUN from the SnapView session.
- D. Remove the global pool LUN associated with the SnapView session from the reserved LUN pool.

Correct Answer: B

---

#### QUESTION 3

Which replication function is used for failover testing or data migrations with the source file system in production?

- A. Switchover
- B. Failover
- C. Reverse
- D. Incremental

Correct Answer: A

---

#### QUESTION 4

You have installed and implemented a VNX for File. After manual failover tests have been performed, a problem occurs on the primary Data Mover and the system becomes unavailable to the users. While reviewing the status in Unisphere, the Data Mover is reported as fault/panic and no failover occurs.

What is the reason for this issue?

- A. Failover policy is set to manual
- B. Hardware configuration mismatch between the primary and standby Data Movers
- C. Primary Data Mover configuration is not visible to the standby Data Mover
- D. Failover will not occur when the Data Mover is in a panic state

Correct Answer: A

---

#### QUESTION 5

Where in Unisphere do you assign FAST Cache to LUNs?

- A. At the LUN level under a RAID group
- B. At the LUN level under a storage pool
- C. Under FAST Cache system properties
- D. Under the Advanced tab of RAIDGROUP Properties

Correct Answer: A
