QUESTION 1

What should an application developer do before debugging an HTTP Inbound activity in the process debugger?

- A. Alter the process data associated with the activity.
- B. Validate and save the process template.
- C. Install a web server onto the development machine.
- D. Set the port number in the Preferences dialog box.

Correct Answer: D

QUESTION 2

An application developer is configuring an SMTP activity template with the requirement to display the process variable claimnumber in the subject line.

As an example, the subject line of the email should read as follows:

You have been assigned claim 123456

What should the application developer type in the Subject field of the activity template?

- A. You have been assigned claim \$claimnumber.
- B. "You have been assigned claim " + claimnumber.
- C. You have been assigned claim @claimnumber.
- D. You have been assigned claim {claimnumber}.

Correct Answer: A

QUESTION 3

A parent business process invokes a child business process.

Which change will definitely cause errors?

- A. adding a correlation identifier to the child process
- B. adding a new mandatory package to the child process
- C. adding a new structured data type to the child process
- D. adding a process parameter to the child process

Correct Answer: B

QUESTION 4

An application developer built a solution that invokes processes using the DQL Inbound - Initiate activity.

Which aspect of this activity may require updating prior to packaging with Composer to ensure optimum performance in production?

- A. DQL Qualification To Fetch Objects
- B. Update Object Attributes Query
- C. Post Process Option
- D. Polling Frequency

Correct Answer: D

QUESTION 5

An insurance claims process invokes a child process that is used to determine whether the person making the claim has secondary insurance. During the child process, a Boolean value, `has_other_insurance`, is set by a task processor. How should the `has_other_insurance` data item be defined so that the data can be shared between the parent process and child process?

- A. as a process parameter
- B. as a structured data type
- C. as a simple process variable
- D. as an attribute of a package

Correct Answer: D
